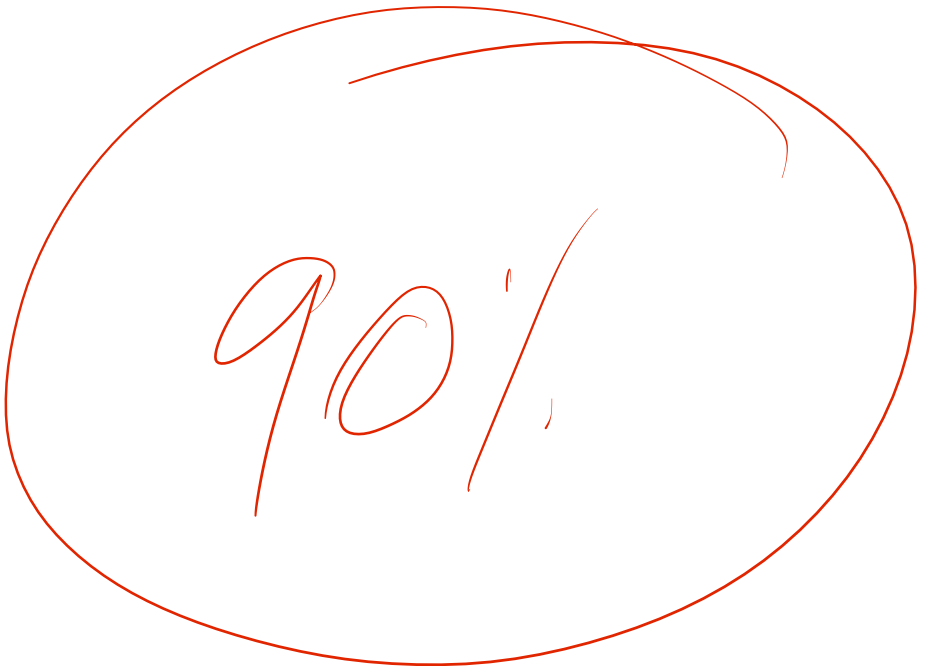
Group Number 6:

Aasminpreet Singh Kainth

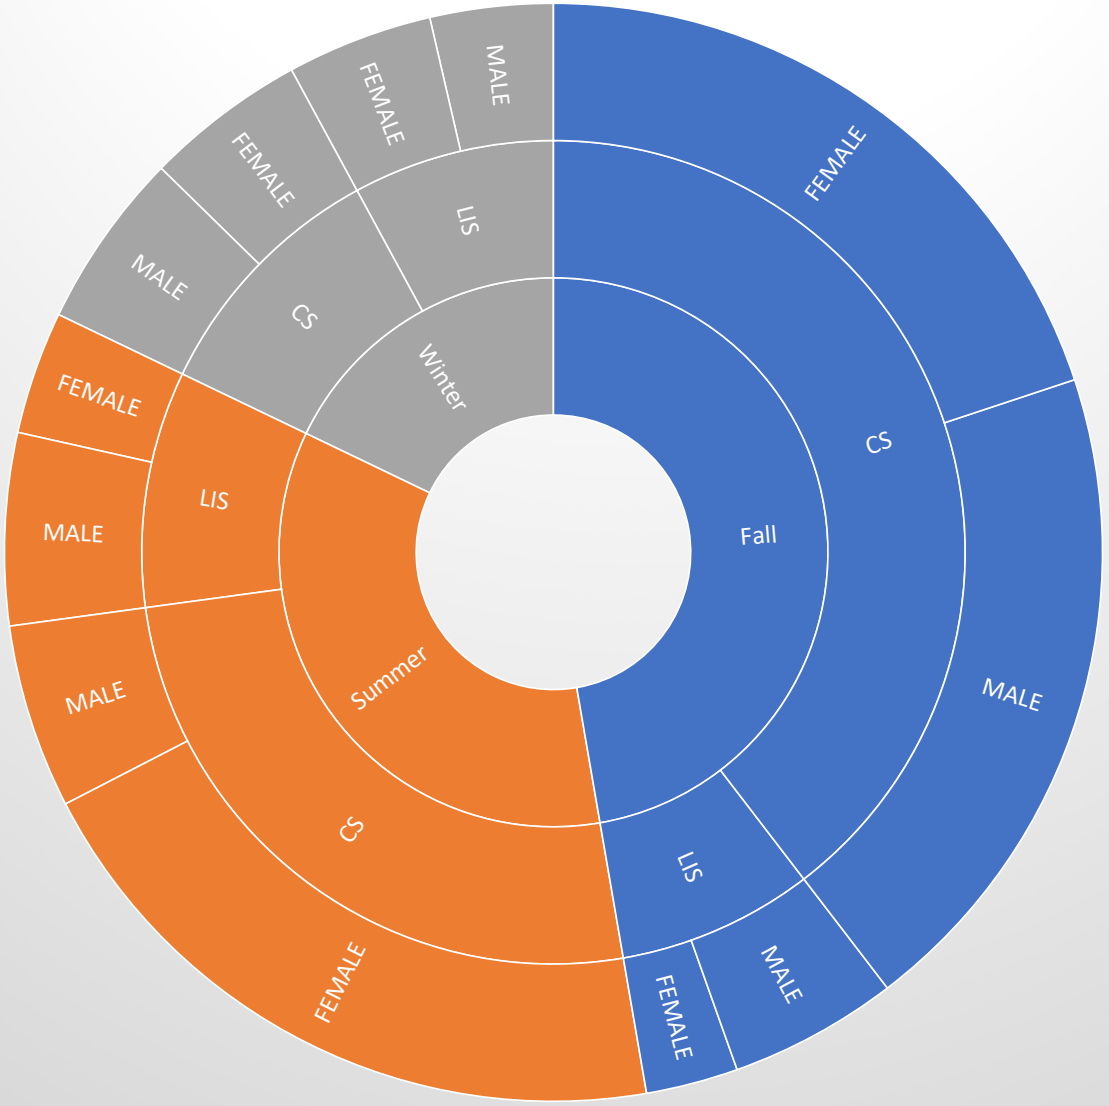
Harini Sanjay Pathak

Liam Stubson

Generally speaking very good



Western Student Intake for CS and LIS



This Visualization represents the number of students who entered the program in Fall, Winter, and Summer terms for hierarchies.

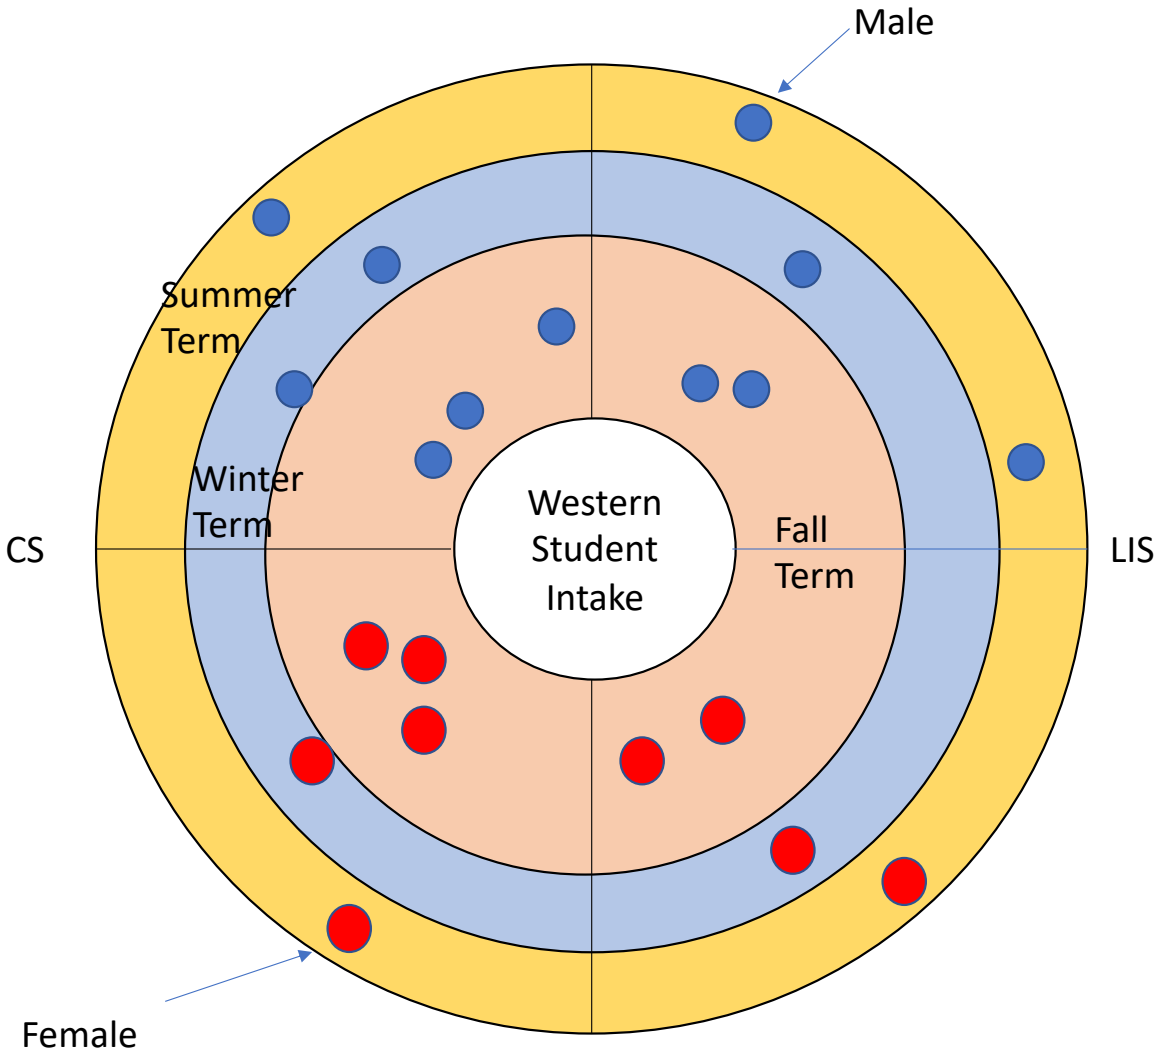
It has been into further grouped LIS and CS Students to compare the two programs.

It is further broken down and shows the gender make-up of each term by the cell size of the "Male" or "Female."

This Visualization represents the number of students who entered the program in Fall, Winter, and Summer terms for hierarchies via different coloured circles.

It has been into further grouped LIS and CS Students to compare the two programs. LIS on the right, and CS on the left.

It is further broken down and shows the gender make-up of each term by individual cells showing each student in the program (blue for male students joining and red for female students



what about other requirement e.g. relations?

The Bar Graph shows The 5 teams, Canada, India, Russia, Japan, USA.

Each part of their bar represents the 4 properties:
- Medals won (Gold, silver, Bronze)
- Participants (Male, Female)
- Games Won (Numerical Value)
- Games Lost (Numerical Value)

You can compare the 5 countries ordinally by comparing the 4 properties to each over to see that - for instance, Russia has the most participants, followed by India, etc.
