

ATM Withdrawal, Deposit and Transfer Transactions

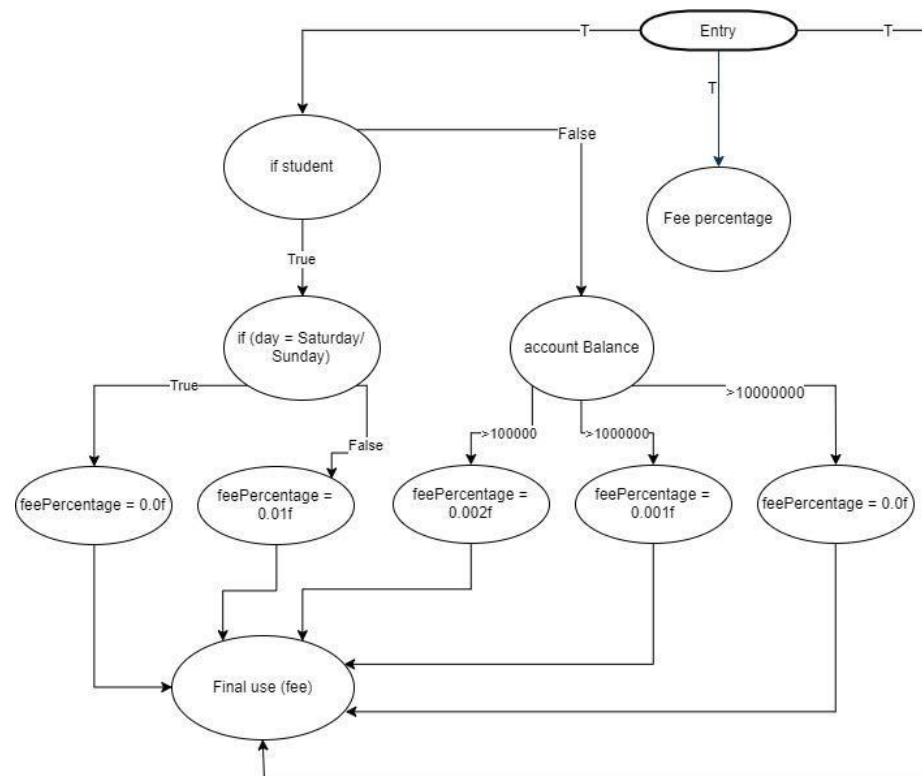

White Box testing

TEST SCENARIO: TS-001

BUSINESS SCENARIO:	Withdrawal Transaction
TESTER	Group 12 (Aasminpreet Singh Kainth; Ria Ria; Sai Lakshmi Pravallika Samayamanthula; Vishwa Sai Kodyala)
DESCRIPTION:	Computing the Slice and developing the test cases based on Statement Coverage

Steps Followed are the following:

Step 1 -> Computing the slice: The program is sliced based on the slice criterion Final Use (fee) i.e., return fee
Program Dependency Graph (PDG) for computed slice:

Step 2 -> Statement Coverage: Developing the test cases for performing the statement coverage on the computed slice.

ATM Withdrawal, Deposit and Transfer Transactions

White Box testing

TEST CASES:

CASE ID	TEST CONDITIONS	INPUT DATA / SPL. INFORMATION	EXPECTED RESULT	ACTUAL RESULT	Pass / Fail
1.	Checking whether the client is a student and the day is Saturday	Client: Student Day: Weekend (7) i.e., Saturday	No fee	No fee	Pass
2.	Checking whether the client is a student and the day is Sunday	Client: Student Day: Weekend (1) i.e., Sunday	No fee	No fee	Pass
3.	Checking whether the client is student and day is weekday	Client: Student Day: Weekday (2)	Fee is 0.1% of the amount withdrawn	Fee is 0.1% of the amount withdrawn	Pass
4.	Checking whether the client is not a student and the account balance is less than 100000	Client: Not a student Day: Weekday (2) Account balance: 99995	Fee is 0.2% of the amount withdrawn	Fee is 0.2% of the amount withdrawn	Pass
5.	Checking whether the client is not a student and the account balance is less than 1000000	Client: Not a student Day: Weekday (2) Account balance: 999955	Fee is 0.1% of the amount withdrawn	Fee is 0.1% of the amount withdrawn	Pass
6.	Checking whether the client is not a student and the account balance is greater than 1000000	Client: Not a student Day: Weekday (2) Account Balance: 1000001	No fee	No fee	Pass

ATM Withdrawal, Deposit and Transfer Transactions

White Box testing

TEST SCENARIO: TS-002

BUSINESS SCENARIO:	Deposit Transaction
TESTER	Group 12 (Aasminpreet Singh Kainth; Ria Ria; Sai Lakshmi Pravallika Samayamanthula; Vishwa Sai Kodiyala)
DESCRIPTION:	Process of depositing money into an account using ATM

Code Snippet: Calculate Deposit Interest

```
33 public int calculateDepositInterest(int amount, int accountBalance, boolean student) {
34     // Calculate interest percentage
35     float interestPercentage;
36     // Check if student
37     if (student) {
38         // Check amount deposited
39         if (amount > 10000) {
40             // Check balance
41             if (accountBalance > 100000) {
42                 interestPercentage = 0.01f;
43             } else {
44                 interestPercentage = 0.005f;
45             }
46         } else {
47             if (accountBalance > 500000) {
48                 interestPercentage = 0.005f;
49             } else {
50                 interestPercentage = 0.002f;
51             }
52         }
53     } else {
54         if (amount > 50000) {
55             if (accountBalance > 500000) {
56                 interestPercentage = 0.01f;
57             } else {
58                 interestPercentage = 0.005f;
59             }
60         } else {
61             if (accountBalance > 1000000) {
62                 interestPercentage = 0.005f;
63             } else {
64                 interestPercentage = 0.0f;
65             }
66         }
67     }
68
69     // Calculate interest
70     int interest = Math.round(amount * interestPercentage);
71
72     return interest;
73 }
```

ATM Withdrawal, Deposit and Transfer Transactions White Box testing

Control Flow Graph for Deposit transaction:

Define/Use Nodes for '*interestPercentage*' in deposit transaction:

Variable	Defined at Node	Used at Node
<i>interestPercentage</i>	42, 44, 48, 50, 56, 58, 62, 64	70

ATM Withdrawal, Deposit and Transfer Transactions

White Box testing

Selected Define/Use paths:

Variable	Path (Beginning, End) Nodes	Definition Clear?
<i>interestPercentage</i>	(42,70)	Yes
<i>interestPercentage</i>	(44,70)	Yes
<i>interestPercentage</i>	(48,70)	Yes
<i>interestPercentage</i>	(50,70)	Yes
<i>interestPercentage</i>	(56,70)	Yes
<i>interestPercentage</i>	(58,70)	Yes
<i>interestPercentage</i>	(62,70)	Yes
<i>interestPercentage</i>	(64,70)	Yes

DU paths for '*interestPercentage*':

P1	P2	P3	P4	P5	P6	P7	P8
							

ASSUMPTIONS:

1. The maximum amount that can be deposited is \$1000000 per transaction.
2. The minimum amount that can be deposited is \$0 per transaction.
3. Negative amount cannot be deposited.
4. The minimum possible account balance is \$0.
5. There is no maximum limit for account balance.
6. Appropriate exceptions are thrown for illegal arguments.

PROCESS FLOW:

1. Specifying the input for deposit amount and account balance.
2. Calculating the expected fee for deposit amount based on the specification.
3. Checking if the expected fee is equal to the observed fee calculated by the program.

7	DU7 Client: Not a Student, Amount Deposited: <=500 Account balance: >\$10000	Student: False depositAmount: 40000 accountbalance: 1200000	0.5% fee is charged on the amount deposited.	0.5% fee is charged on the amount deposited.	PASS
8	DU8 Client: Not a Student, Amount Deposited: <=\$500 Account balance: <=10000	Student: False depositAmount: 30000 accountbalance: 500000	No fee is charged on the amount deposited.	No fee is charged on the amount deposited.	PASS

COMMENTS

ATM Withdrawal, Deposit and Transfer Transactions

White Box testing

TEST SCENARIO: TS-003

BUSINESS SCENARIO:	Transfer Transaction
TESTER	Group 12 (Aasminpreet Singh Kainth; Ria Ria; Sai Lakshmi Pravallika Samayamanthula; Vishwa Sai Kodiyala)
DESCRIPTION:	Basis Path Testing

Basis Path Testing:

To compute the test cases with the help of Basis Path testing, we need to follow below steps:

Step-1: *Compute the program flow graph. For Transfer, below is the compute flow graph.*

Below are control flow graphs,

1st Control Flow Graph denotes when client is student.

2nd Control Flow Graph denotes when client is not student.

Step-2: *Compute Cyclomatic Complexity.*

In this case, it is 16. $V(g) = \text{Cycles} + 1(\text{Outer Region})$

Step-3: *Select Basis set of paths from the control flow graph.*

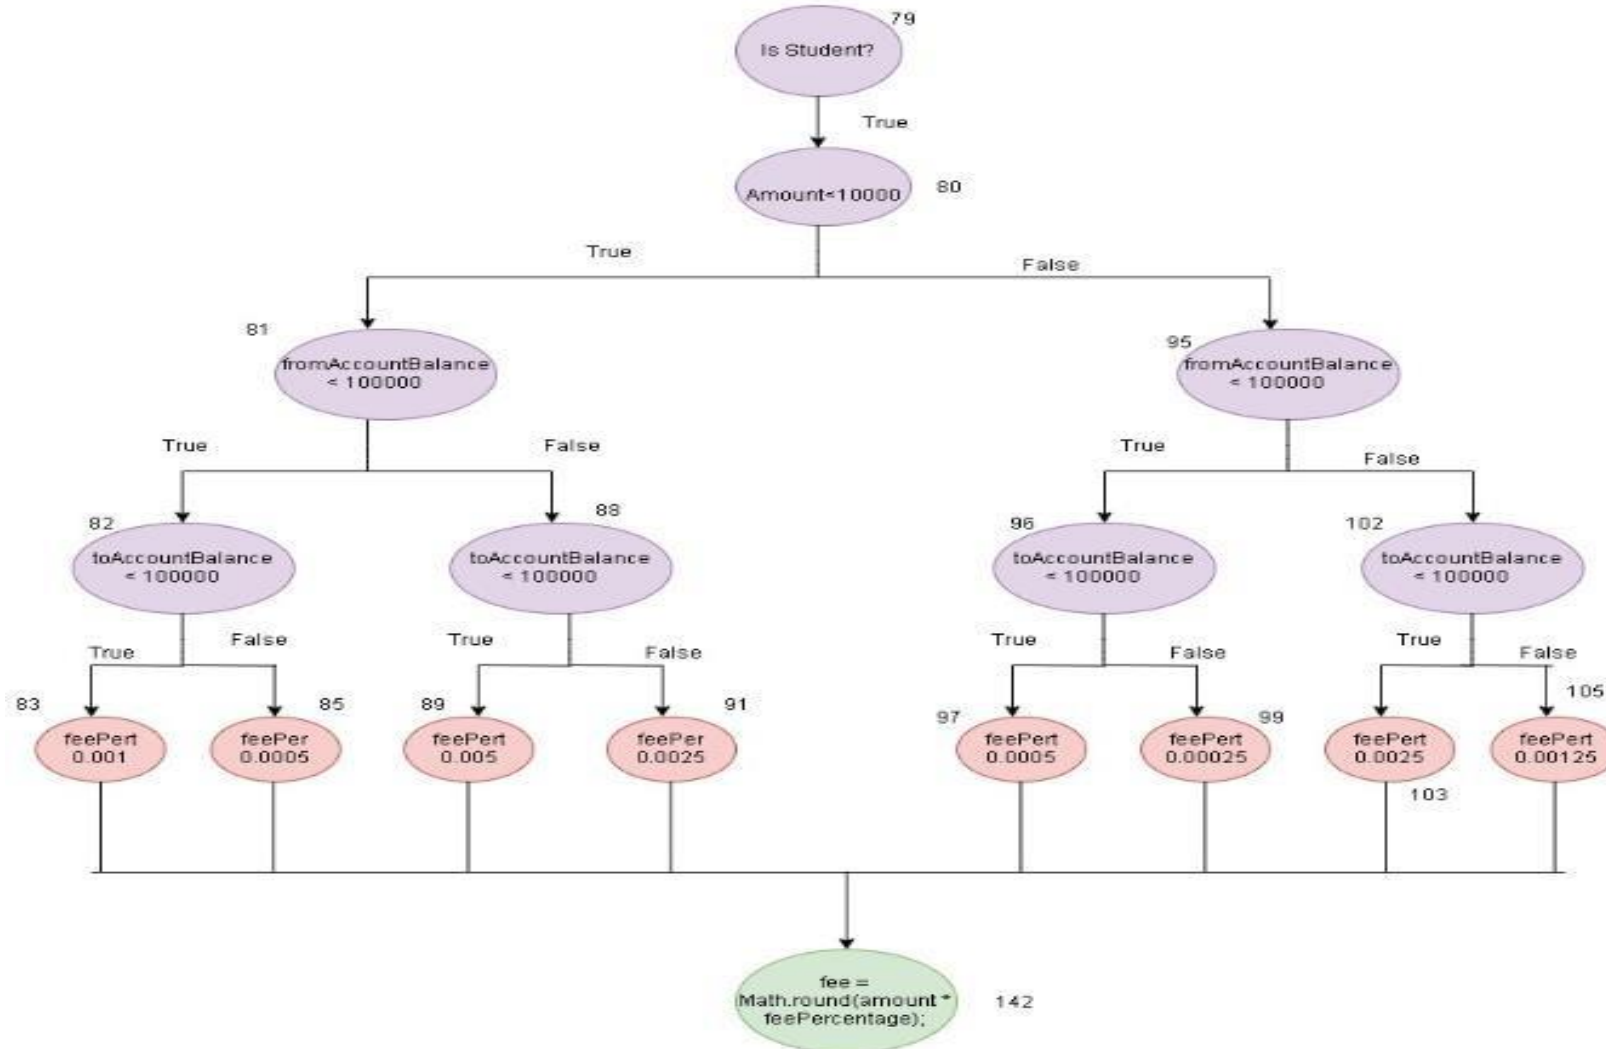

We got 16 paths.

Step-4: *Generate test cases.*

For each path we got one test case. Thus, we have 16 test cases.
